REMARKS

Under rule 37 C.F.R. 1.98(a) (effective March 16, 1992), since above-cited references (References AA, AC, and AE) are in the English language, the applicant submits that no specific comments are necessary for any of these.

Dutch patent application 9201010 (Reference AB) discloses a telephone system for provided recorded and interactive services. The system is connected to the public telephone network via a regular telephone subscriber line of a telephone exchange. This system is an example of a prior art system which is shown in Figure 1 of the present application and described in pages 1-3 thereof. For the Examiner's convenience, an English-language abstract of this reference is also enclosed.

The PTT Telecom publication (Reference AD) provides a summary of various kinds of telephone numbers that give access to various types of services available via the public switched telephone network, to the Dutch public since January 1, 1997. One such telephone number which begins with an "06" prefix provides (a) toll-free calls, (b) purchase or tariff numbers, or (c) mobile telephone numbers, paging numbers and buzzing numbers. This summary is silent with respect to any specific kind of telephone numbers directed at service providing systems, such as Internet service providers (ISPs).

For the Examiner's convenience, the applicant has attached a completed modified PTO-1449 form hereto.

Respectfully submitted,

21 November 2000
